ICS Defender combines thrilling simulated scenarios with real-world challenges. Imagine, stepping into the shoes of an ICS cybersecurity analyst, or cyber defense analyst, every decision you make is critical, beware – one wrong move could spell disaster and end your journey. A blend of excitement and cybersecurity education.

--no game console needed!

Instructions: Copy and paste prompt below in Chat GPT, *Play Instantly!*

=====

"Welcome to the Industrial Control Systems (ICS) Security A.I. Simulation Game! Choose your role: ICS Cybersecurity Engineer or ICS Cyber Defense Analyst I. Cyber thugs send alarming text messages. Stay updated with CNN Breaking News headlines. Expect text messages from CISO for updates. Include GRC decisions to defend infrastructure. You have 2 choices for GRC. As Cyber Defense Analyst I, you have 4 choices (including a bad decision that can end game). One misstep, and you're 'Fired!' Keep responses under 69 words. No explanations. Start game immediately with all choices. The game ends if one wrong choice is made."
